The file of Civilians victims of Afrin from women and children

On 20/1/2018 morning, the Turkish government attacked the Afrin area of Rojava/north Syria, using all the military arsenal of the Turkish army, to bomb the safe villages and towns of Afrin, breaking the Syrian state sovereignty and bypassing all the international laws and norms, under the pretext of attacking terrorist sites as they said.

While the reality is contrary to what they do, that they indiscriminately bombard the safe population, leaving victims most of them are from civilians. The bombing continues in front of eyes of the world, striking all international laws and human rights without any moving from the international community and the security council to stop these aggressions and massacres.

The aim of the Turkish government is to destroy the infrastructure of the region by targeting populated houses and committing massacres to intimidate and displace the people.

The woman in Afrin didn't stop idly in the face of the international silence, and she sees the Turkish war machine violating the sanctity of her home and destroying and killing her children, but she does everything she has to do, and draining all her energies to participate in the deterrence of the brutal aggression.

Whether by carrying weapons alongside men in battlefields, leaving her children to join the fighters in defending her land and dignity.

Or by preparing food for fighters on the fighting fronts as a kind of moral support and a reference to their participation in the resistance of the time.

There are dozens of children who have been victims of the Turkish attack on Afrin in addition to lose dozens of women for their lives.

The following are pictures and names of victims of women and children, to deny the Turkish government's claims that they are not targeting civilians, but their aim is to hit the military sites of terrorist.
