

Appeal to the international community

The lands are being violated , children are being killed , and women are assaulted ,and the world is still silent about the massacres committed .

Afrin province is still being attacked by the Turkish army and its supporters from Al-Nusra and Al-Qaeda ,where the Turkish planes and cannon began to shelling the villages , townships , and areas . Not only that , they also began to shelling the city center in order to intimidate and displace the citizens ,which led to massacres against children , women , the elderly and defenseless civilians , including immigrants who fleeing from their villages to the city to escape from the brutality of the Turkish army .

The aim from the Turkish aggression is to displace the indigenous people of Afrin province through implementing the scorched-earth policy. This is what Erdogan said when he announced the he would continue to shelling Afrin until he create a safe area , according to his claimed , to return three million Syrian refugees who have been in turkey since the beginning of the crisis in Syria , and this is the biggest evidence that he is fighting to change the demographic of the region as he has done in Grables and Al-Bad regions .

Erdogan is trying in various ways to occupy Afrin by striking the infrastructure of the Kurdish people by striking the economic movement and spreading terror in the people hearts by shelling houses and buildings . as a result , the children are the first victim of this war , causing them psychological and neurological situations that can't easily processed , it isn't easy that children see their parents killed in front of their eyes . in addition to, they prevent children and young people of the right to education by targeting many schools ,which in itself is a humanitarian disaster .

The Turkish state has exceeded all international and humanitarian laws and conventions in its aggression on Afrin . The chlorine gas has been used on the border villages , this was the doctors reports confirmed through the symptoms that appeared on patients such as : suffocation , redness of the skin and other symptoms . They also mutilated the bodies with the most inhumane methods .

Even the stones didn't get rid of their evil ,so they targeted the historical and archaeological sites in Afrin in order to erase the history of civilizations living on that land and also erase the traces of the humanity from existence .

We are surprised by the international silence ,the humanitarian organizations and the children and women rights towards these massacres and inhumane violations committed in Afrin .

We are the Afrin women determined to defend on our history ,our heritage and the land that we inherited from our ancestors . So we pledge that we will resist and fight until the last hint to eliminate injustice and tyranny and stop the Turkish occupation .

We are the women's organizations in Afrin region , we appeal to all human rights organizations ,institutions ,and the united states to break their silence and move and protect the women history and their heritage in Afrin and stop the bloodshed and the loss of innocent lives .

The women organizations in Afrin
